Hello,
I get the following linking error when I compile HelloWorld in Arch:

(): Linking has failed
(): /usr/bin/ld: /home/phantom/out/examples/Draw/CLANG.Gui.Shared/Draw.a(Font Fc.o): in function `Upp::GetFontInfoSys(Upp::Font)':
(): FontFc.cpp:(.text._ZN3Upp14GetFontInfoSysENS_4FontE+0xef): undefined reference to `FT_Get_X11_Font_Format(FT_FaceRec_*)'
(): clang-13: error: linker command failed with exit code 1 (use -v to see invocation)

I tried updating packages, recompiling everything, but the error persists in both stable and nightly.

It seems that anything using the Draw library fails building.

I found that the upp.src in my home folder was not up to date. Deleting and resyncing with git solved the issue.
