I have a Windows 7 Professional 64 bit operating system. I unzipped the file and tried to run theide.exe. I get the following error: The entry point ScripFreeCache is not found in the dynamic link library GDI32.dll

I have tried to fix this one yesterday, so the fix should be in today's nightly:

https://www.ultimatepp.org/www$uppweb$download$en-us.html

Can you please retry with that latest nightly?

Mirek
