Subject: does msvc work for core console but not GUI -confused
Posted by reign_of_terror on Sun, 20 Feb 2022 12:09:11 GMT

Hi -

I used MSVC to compile some sample array code with log and dump. It compiled and built.
I then tried to use it in ctrlib app to compile exe.
I can compile exe with postgresql using clang but not msvc.

Is that normal?

It gave me some 1120 error looking for a main in the sample app.

There is like a GUI main but not a C++ int main();

It is not a big deal but I am just curious. thanks -
