Subject: No mouse hover tip?

Just downloaded the latest package (upp-win-16270.7z) and tried U++ for half an hour. It's amazing! I already have the urge to dump all other IDEs.

But soon I noticed a missing feature that is very common in other similar IDEs. If I hover mouse pointer on a symbol, it does not provide dynamic tips for that symbol. Or, do I need to configure something?

Hello,

Thanks for good word! It is currently unsupported, but the feature is worth doing. We have everything in place. We have our documentation stored in .tpp file. The only thing we should do is just understand the symbol and then show appropriate tooltip.

It is worth doing when we will move to libclang (right now Mirek is experimenting with that technology).

Regards,
Klugier
