I have a sample.rc in my pacakge. It seems TheIDE does not automatically process this kind of file (like other IDEs). How should I do to tell TheIDE correctly compiles and link it to main exe?

Hi

See GeoFun from examples.

.rc is only for Windows

.rc is only for Windows

Thanks. It turns out that TheIDE does automatically handle RC file.

My problem is that TheIDE does not work well with other 32-bit compilers other than the builtin ones. My test package builds correctly with RC if I use any 64-bit compilers or builtin 32/64-bit CLANGs.

Please advise how to fix the compiling issue of the upp example of the Geofun and Eyecare packages, which involve resource file (.rc) problems.

Thank you in advance.

My configuration is Win10, upp-win-16974.
