Subject: "Close all files tabs" always leaves last one open

Not sure if this is a "feature", but I found it quite annoying. If it is by design, can I make a wish that it should really close *\*all\** file tabs?

EDIT: I cannot close the last open file tab either. Is it really a "feature"?

There is a problem caused by this "feature" - there are always some leftover files in temp-aux node.
