Subject: Cannot compile PromptOK(inputBox.GetText())

This is a very basic question regarding WString.

My inputBox is a EditString. According to docs, GetText() returns a WString which in turn has:

operator const char *() const
const char *operator~() const
Returns Begin().

EDIT:
I see that U++ framework uses UNICODE by default, but the docs only has "char" version.

Now the question is how to display a messagebox with WString?
