Problem is in calling ShowQTF at line 203 in idetool.cpp called from line 290:

```
void ShowQTF(const String& qtf, const char *title)
{
    RichText txt = ParseQTF(qtf);
-> ClearClipboard();
-> AppendClipboard(ParseQTF(qtf));

    WithStatLayout<TopWindow> dlg;
    CtrlLayoutOK(dlg, title);
    dlg.stat = qtf;
    dlg.Sizeable().Zoomable();
    dlg.Run();
}
```
