Dear U++ community,

I have just startet to use U++, so sorry for asking real newbie questions.

I can't find a way to change the colors of a button in a simple way.
I already tried the following: (on Windows 10)

```
myBtn.NakedStyle();  
Button::Style foo;  
foo.textcolor[0-4] = Color( 100, 100, 100 );  
myBtn.SetStyle( foo );
```

Ok, I can change the main text color. But what about the hover and clicked color?
And is there also a way to change the background colors (normal, hover and clicked)?

Is there a struct with all these values? (Taht would be so much easier.)

All the best
NetDiver
