Hi,

I'm having an issue with saving .cfg file that has Windows path in it.
If i try to save it in the same folder as the .exe with SaveFile("config.cfg", cfg) it saves it in a random "This PC" folder!

```
FileSelNative fs;  
fs.Type("jpg & png Images", "*.jpg;*.jpeg;*.png;*.png");  
if(!fs.ExecuteOpen()) return;
```

```
String cfg;  
cfg << "PATH=" << ~fs << "\n";
```

```
//This works  
if(!SaveFile("C:\\Users\\ATT\\Documents\\upp_16660\\out\\MyApps\\CLANGx64.Debug.Debug_Fu  
ll.Gui\\config1.cfg", cfg))  
LOG("Error saving configuration!");
```

```
//But this will save it in my Downloads or Pictures or Desktop.. folder  
if(!SaveFile("config2.cfg", cfg))  
LOG("Error saving configuration!");
```

Hi,

You can use Upp::GetExeFolder() function to get the directory of the exe file.

Best regards,
Oblivion

Hi,

GetExeFolder() works like a charm.

Thank you very much Oblivion.
