Subject: Latest leap second missing from GetLeapSeconds()

Hi,

It seems the latest leap second is missing from GetLeapSeconds(Date dt) in TimeDate.cpp. It was applied on December 31, 2016, but is missing here.

(Actually I'm looking for a way to deal with GPS time vs. UTC time, so this function will come in handy.)

Best regards,

Tom

Hopefully fixed. { 2016, 12 }, correct?

Mirek

Mirek,

Thanks for the quick fix. Yes, { 2016, 12 } looks right!

Best regards,

Tom
