I am checking Reformat Code in Editor.

Edit->Reformat->Reformat Code (Ctrl+I)

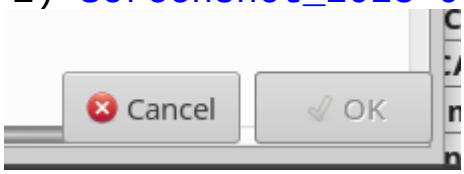

The "OK" button remains disabled.

Probably I am missing some utility install.

Require to Install
sudo apt install clang-format

Suggestion - Can this be added to install script.

Hello Deep,

It is added already, if you download any of the latest nightly build you should have appropriate dependency. Also, it is highly recommended that your uppsrc directory should contain .clang-format file. If you do not have it, just download latest nightly.
