it return ItemRect::convert that is initialized with NULL, and is always NULL.

```
    Convert*  GetConvert()                    { return convert; }
```

and SetConvert() does not change ItemRect::convert.

```
GridCtrl::ItemRect& GridCtrl::ItemRect::SetConvert(Convert &c)
{
 (*edits)[id].convert = &c;
 return *this;
}
```

it seem that either : GetConvert shall return (*edits)[id].convert
 or SetConvert shall set ItemRect::convert (convert = &c;)
