Example: select all rows with odd numbers

select MT_ID From MY_TABLE Where MT_ID & 1;

When I try to code that in Upp it doesn't compile.

```
Sql sql;
sql*Select(MT_ID).From(MY_TABLE).Where(MD_ID & 1);
while (sql.Fetch())
{
...
}
...../test.cpp (114): error: invalid user-defined conversion from 'int' to 'const Upp::SqlId&' [-fpermissive]
Is there a way? (besides sql.Execute())
```
