Upp: 16875

Toolchain: VS2020 Community Edition

OS: Windows 10 64 Bits Professional Edition

How to reproduce the problem ?

1. Open main package "StatusBar" from assembly "refrence"
2. Build & Run
3. Resize the window by your mouse
4. Watch the task manager, the memory usage of this program increases quickly on resizing

If we disable the statusbar (easy to do), the memory usage would be fixed.
