Subject: Is this a feature or a memory leak?

Upp: 16875

Toolchain: VS2020 Community Edition

OS: Windows 10 64 Bits Professional Edition

How to reproduce the problem?

- 1. Open main package "StatusBar" from assembly "refrence"
- 2. Build & Run
- 3. Resize the window by your mouse
- 4. Watch the task manager, the memory usage of this program increases quickly on resizing

If we disable the statusbar (easy to do), the memory usage would be fixed.
