Hi All,
Not to Offend as I feel the interface has basic working principles that many use efficiently.
However I feel it can use a sense of design and flow.

I wanted to see how others feel before I invest time (Im a UX designer) .
How do people feel about a the design of the THEIDE and what do they like or not like(from design perspective)

Im try to separate whats possible from the GUI and the design . ie some widgets may need to be developed.

Thoughts, suggestions
C

Design(total votes: 4)

I like it as is	2/(50%)
Minor Tweaks but look and feel all good	1/(25%)
Layout is fine but needs a refreshing of style	0/(0%)
style is fine but layout needs reworking	0/(0%)
both style and layout need reworking	1/(25%)
