Hello,

I have another issue in dark mode. The label box diappear (see picture) 8o .

I tried to put Ctrl::SetDarkThemeEnabled(); in GUI_APP_MAIN

GUI_APP_MAIN
{ Ctrl::SetDarkThemeEnabled();
...
}

With no result. Is there a way to fix it.

Thanks a lot,
Luigi

edit: in theIde the LabelBox is barely visible but in my app it is completely disappeared

I changed the title.
In fact today i compiled the same program with the latest Upp under Windows and Linux Fedora
as well.
In Linux I see the borders of the labelbox. In Windows they are absent.

Thanks,
Luigi

Hello,

the default color of labelbox is not visible in darkmode. However if I use

.SetColor(SBlack());

then the box appear.

I wish this is the default color. Otherwise would be nice to have this method in the lay panel.

Luigi

edit: I found

LabelBox::LabelBox()
{
 color = Null;
 SetInk(LabelBoxTextColor());
}

If I set

color = SBlack();

my problem is solved.
Is this a safe way to proceede?

I see no problem with Win 10.

Is this Win11?

Can you try

DDUMP(SColorShadow());
DDUMP(LabelBoxColor());

Mirek
