how to do i resize a droplist added to a toolbar to display it at a size it can be viewed correctly?

SOLVED: use `bar.Add(control, Size(w,h));`

Hi rforcen

If I remember well it resizes automatically to view all correctly.

Please indicate what is your operating system, desktop, etc, and include the source code of a simple sample with the problem.

some controls as Label do, but Button, DropList, etc. don't,

I've solved the issue by just using the Size parameter, `bar.Add(control, Size(w,h));`
