Hello,

I decided to release a new version of U++ for Flathub. It means that for Flatpak we have version 2024.2.1. This version addresses one serious issue. It is a compilation error of FontFc.cpp on the latest distros. Also, the whole flatpak is based on Freedesktop platform version 24.08, which is the latest one.

Links:

- <https://flathub.org/apps/org.ultimatepp.TheIDE>
- <https://github.com/ultimatepp/ultimatepp/issues/203>
- <https://github.com/flathub/org.ultimatepp.TheIDE/pull/11> - compilation error fix for U++ Flatpak
- <https://github.com/flathub/org.ultimatepp.TheIDE/pull/12> - platform upgrade to 24.08 version for U++ Flatpak

For raw U++ POSIX distribution, stay tuned for 2024.1. Also, if you encounter that problem you might install nightly build instead.
