Upp17448 windows

If link package with CLANG64 there is no problem

But if try to build same source with CLANG32 links fails with duplicate symbols

Minimal source code to reproduce in attachment test-src.zip

This issue due to clang. It could be fixed by modifying file `upp\bin\clang\include_mingw_mac.h` line 285

```
from: # define __mingw_ovr inline __cdecl
to: # define __mingw_ovr static inline __cdecl
```
