Subject: IDE file Preprocess doesn't work anymore
Posted by Didier on Thu, 19 Dec 2024 18:48:36 GMT

Hello,

Preprocessing a file is very pratical when dealing with macros.

It hasn't been working for a long time on my PC (Linux).
It fails with message:
   it_trunk/uppsrc/CtrlCore/Gtk.h:12:10
   : fatal error: 'gtk/gtk.h' file not
   found

There are no config parameters (or I didn't find them) so I think this is a bug
