Hi U++ Owner/Sr.Members,

I search web and find a free old version of PDF.

Do you have a latest PDF version? Usually when a new version U++ released, it should contain the refreshed PDF too, such as convert online web to PDF.

Or at least publish when have big changes, or yearly. It should be helpful to promote U++.

Thanks.

Btw, I know have a book sell now.

But may be somebody want to refer to framework itself free version PDF firstly, and then decide whether pay \$ to purchase expert version in case really need deep dive.

Thanks.

Regards,  
Scott Huang
