Hello all,

it would be great to have a Window designer, next to the icon designer and the layout designer.

What features could it have:

- have a WYSIWYG look of the TopWindow and its controls/frames/...
- the option to include menu bar, status bar
- include layouts as parent control
- insert individual controls
- add FrameCtrl options to link frames/controls together
- (CtrlFrame can be done in the layout designer)
- add splitter frame and splitter frame controls
- ...

It would be a huge work, but I think many developers would appreciate this extra RAD feature.
It's a new year, so this is something I wanted to put on the wish list :p
