Subject: Weight of the compiled program
Posted by Kp6z07x09 on Thu, 06 Feb 2025 22:46:53 GMT

Hi,

I'm testing U++ and it's really interesting. However, I have a question about the Wright od the binary file. I compiled the "hello world" example and the Wright od program is slightly above 5mb. in the FAQ section it is written that the program should weigh less than 1mb (www.ultimatepp.org/www$uppweb2$FAQ$en-us.html). Am I doing something wrong or is 5mb the initial weight of u++ itself?

Regards, KP6
