Subject: include an excel file in the program

Hello,

I would like to include an excel file (xlsx format) in my program to be used as model.
At request it is saved and populated with data. Is there an U++ way to park it inside my program?
I do not want it to stay out of my program because I am afraid the user can delete or modify it.

Thanks,
Luigi

Hi Luigi,

If I understand correctly, I don't think there is a direct way to do what you describe (saving a modifiable file into the exe) in U++.
However, you can include a preformatted excel file into your exe binary using a BRC file.

Best regards,
Oblivion
