Hello

I have added several buttons to an ArrayCtrl with this code

```
void TournamentTiebreakDlg::AddBtn(int row, int col, int idTB, String label) {
   Button& btn = gridtb.CreateCtrl<Button>(row,col);
   String I = label;

btn.SetLabel(I);
  btn << [&,row,col,idTB] {
   SetTB(row, col, idTB);
  };
}</pre>
```

Now I need to get some of these buttons and disable them. I am tryng stuff like this Button& btn = panel.gridtb.GetCtrl(4,1); but the compiler keep complaining all my temptives. Which is the recommended way?

Thank you very much, Luigi
