How do I configure line numbers positioning in the CodeEditor package?
Currently it seems to be left aligned, i want it to be right aligned?

I have this basic code -

```
include <CtrlLib/CtrlLib.h>
#include <CodeEditor/CodeEditor.h>

using namespace Upp;
 /*
INITBLOCK {
   Ctrl::SetDarkThemeEnabled(false);
   Ctrl::SetSkin(ChStdSkin);
}
*/

class Notepad : public TopWindow {
   CodeEditor editor;

public:
   Notepad() {
      Title("Simple Notepad");
      Add(editor.SizePos());

      editor.LineNumbers(true);

   }
};

GUI_APP_MAIN
{
   Notepad().Run();
}
```

Also, i am unable to find documentation for the CodeEditor package.

Yeah, well, CodeEditor is practically part of TheIDE codebase (meaning it is pretty much specialised for that role) and documentation is lacking here and there in U++, that is sad fact.

I guess you have 2 options: Develop your own CodeEditor or propose a change (ideall a patch) to align numbers right.

Ah, now I see that it actually is right-aligned, except CodeEditor leaves a bit more space on the right for various markings as breakpoints.

OK, added CodeEditor::NoAnnotations

```
Notepad() {
    Title("Simple Notepad");
    Add(editor.SizePos());

    editor.LineNumbers(true);
    editor.NoAnnotations();
}
```

should do what you require (but you neet to use master branch. or nightly build of U++ tomorrow...)

Thank you for your response. What is the release schedule for U++? Will there be a release before year end?

What is the release schedule for U++? Will there be a release before year end?

Unlikely. There might be "announcement" of upcoming release before years end, but it usually takes 1-2 month to release after that. So I guess February/March is realistic.

That said, current nightly is definitely better than the last release :)

Is it usually like this?

95% of time... Frankly, release is just nightly with PR...
