Hello everyone

I think that there is a bug in theIde.

After debugging I missed the keyboard layout is changed from Spanish layout to English Layout.

I am running theIde on Manjaro Linux.

Hello,

Could you provide more details? Specifically: your desktop environment and its version, whether you're using X11 or Wayland, and whether the issue is reproducible every time or only sometimes. If it's intermittent, please list the exact steps you took when it occurred. That will be helpful.

Klugier

I'm using Plasma on Wayland. The problem occurs when debugger exits with error (SIGFAULT). After Oblivion's response maybe it's a wayland problem.
