Added:
- Alpha composition. "Over" operation now correctly composes two alpha images (previously it was able just to compose alpha foreground with opaque background).
- Ctrl SetPos scroll optimization
- Sql updates : http://www.arilect.com/upp/forum/index.php?t=msg&th=1208 &start=0&
- Value improvements : http://www.arilect.com/upp/forum/index.php?t=msg&th=1214 &start=0&
- Small SqlCtrls improvement : http://www.arilect.com/upp/forum/index.php?t=msg&th=1215 &start=0&

Modified:

- Sqlite3 plugin updated to version 3.3.6

Problem with Ubuntu 6.06. When I try to compile with "GCC32 Optimal" build mode I have next linker error:

There were errors. (0:12.83)

With "GCC32 Debug" build mode compilation and linking are ok, bet when I start TheIDE and open any window in TheIDE (for example File->Set Main Package...) and then close that window (cancel or any other button), TheIDE craches, in console I have "Segmentation fault" message. I've attached generated debug file.
