Subject: www updated, a bit of docs added...

I have updated website with reference topics altered by new topic formatting.

Actually, new TabCtrl topic is completely in the final style, rest just has code items headers altered:

http://upp.sourceforge.net/src$CtrlLib$TabCtrl$en-us.html

GUI tutorial now also has a new critical chapter 16

http://upp.sourceforge.net/srcdoc$CtrlLib$Tutorial$en-us.htm l

Please comment. I understand that lack of good docs is now our main problem, I would like to know whether this is a good direction.

Mirek

The new formatting is much more readable, I think.
