I'm using 605 version in Linux and there are several Dialog windows that doesn't admit resize and is going beyound screen (1024x768).

Examples: Build Methods, Assist/Navigate, Build/Output mode, Project/Package Optimizer, Project/Main Package Configuration,Project/Syncronize Translation Files,File/Statistics.

Also the icons for "Up Folder" and "New Folder" in the File Browser are too small.

Sorry I'm using remote access kdm and it seems to change the font size, and it doesn't fit on screen, other applications seem to resize to acomodate properly.

I'm going through the GUI Tutorial and Font zooming isn't working maybe that could be the cause.

Well, this was discussed here some time ago. Please try to find that old topic.

At the moment I am not sure how to resolve this problem....
