I tried to build theide with uvs sources and got the following error in the RichEdit package:

Try RichEdit.h 374:

```
void SetupLanguage(pick_ Vector<int>& lng);
```

Ok, this error is resolved, but I had to also change the method parameter in cpp file.  
I got a new error in RichEdit package:

```
----- RichEdit ( GUI GCC BLITZ FREEBSD ) (16 / 31)
```

```

There were errors. (1:28.06)

Sorry

Editor.cpp 377:

```
void RichEdit::SetupLanguage(pick_ Vector<int>& _Ing)
{
  Vector<int>& lng = const_cast<Vector<int>&>(_Ing);
```

...or just sync uvs2
