---

Under Windows XP and MSC8 compilation of "tutorial Gui19" fails yielding error message

```
...\CtrlLib/EditCtrl.h(130) : error C2248: 'Ctrl::operator =' : cannot access private member declared  
in class 'Ctrl'
```

```
    ...\uppsrc\CtrlCore/CtrlCore.h(250) : see declaration of 'Ctrl::operator ='
```

```
    ...\uppsrc\CtrlCore/CtrlCore.h(180) : see declaration of 'Ctrl'
```

```
    This diagnostic occurred in the compiler generated function 'EditField &EditField::operator  
    =(EditField &)'
```

Werner
