Under Windows XP and MSC8 compilation of "tutorial Gui19" fails yielding error message

...\\CtrlLib>EditCtrl.h(130) : error C2248: 'Ctrl::operator =' : cannot access private member declared
in class 'Ctrl'

...\\uppsrc\\CtrlCore\\CtrlCore.h(250) : see declaration of 'Ctrl::operator ='

...\\uppsrc\\CtrlCore\\CtrlCore.h(180) : see declaration of 'Ctrl'

This diagnostic occurred in the compiler generated function 'EditField &EditField::operator
=(EditField &)'
