Lets say that I have the same topic written in two different lanuages:

HomeBudget/src/About$pl-pl
HomeBudget/src/About$en-us

Is there any way to get topic in poper language automatically?
Now I'm doing sth like this (I must specify $xx-xx suffix, otherwise nothing will be displayed):

```
if lang = polish
dlg.info.SetQTF(GetTopic("HomeBudget/src/About$pl-pl"));
else
dlg.info.SetQTF(GetTopic("HomeBudget/src/About$en-us"));
```

Is there method like let's say GetTopicLang.. which returns topic in language selected in SetLanguage() eg:

GetTopicLang("HomeBudget/src/About") (without suffix)

Not yet.

But seems like a good idea (I mean, to use GetCurrentLanguge).

Yes, I use

//in main section

BasePath = "App/help";

...

```
//in help section

String s = String(BasePath +"/"+ FileTopic +"$"+
String(ToLower(LNGAsText(GetCurrentLanguage()& 0xfffff))));

....

//Execute Help section
dlg.GoTo(s);
dlg.Execute();
```

BTW, I explored HomeBudget when found how to make a beautiful decision of Help System.
(If you are interested, I can upload anywhere an integrated example).

Prevet Sergey,

I am very interested in your example.
Thanks,

Luigi
