like MFC grid control:http://www.codeproject.com/miscctrl/gridctrl.asp
or any other ctrl support this?

No, best you can get is "multiselect", but not selection of individial cells. ArrayCtrl is not intended to be spreadsheet like GridCtrl.

There is alternate GridCtrl by Daniel Kos. Check forum for it.

There is alternate GridCtrl by Daniel Kos. Check forum for it.

GridCtrl supports "cell mode" editing as well as selecting rectangular selections. Unfortunatelly I didn't implemented copy/paste functionality in this mode. It's easy - but I didn't do that because none of my apps needed this. But I add it before releasing first official version.
