---

Added:

- Callback SqlCtrls::operator<<=(Callback cb)

Fixed:

- Paint problem in TheIDE editor: '{}' not refreshed properly
- Refresh problem that demonstrated as whole window repaint after popup Ctrl closed (like when closing MenuBar)
- TheIDE crashed when entering the bracket

Modified:

- Access keys interface:  
GetAccessKeys now return usage just for current Ctrl  
A new method GetAccessKeysDeep returns usage for all tree.
-
