At some moment of the next future I am going to need that the messages of the lib are in Spanish and with complete certainty I will need that the formats of the currency and, mainly, the date have

Perhaps also it could make a translation to Catalan the language that we spoke in Catalunya/Barcelona.

Somebody can indicate to me by where I can be beginning has to do this?

Thanks

Nico

Hi Mirek!

There are the .tr file that contains the spanish translations of packages which I am using for the translation of my develpment application bigmailer. (Core, CtrlLib, RichEdit, Web).

Do you think that he would be better to extract tr of TheIDE instead of my application?

File Attachments
1) esES_.tr, downloaded 1426 times
