Due to changes in the package-related variables (refer to the thread "Enhancing project templates (upt files)") I have updated the UPT (Ultimate++ Package Template) documentation. Please see the attachment.

Please note that the new features "PACKAGE_TOUPPER" and "PACKAGE_TOUPPER_CAPS" will not be available before the next development release.

Werner

When working on a new Ultimate++ package template I noticed a mistake in the "Ultimate++ Project templates" documentation, section 7 "Deployment". The last paragraph must read: "Subdirectories are also scanned." (Shame on me - I myself wrote the documentation.)

The mistake has been corrected in the attached file. On this occasion I updated the first paragraph in section 8 "Epilogue".

May I suggest, Mirek, to replace "PackageTemplates$en-us.tpp" with the attached file?

Werner
