Ooops...

I think Daniel should add ide mingw rebuild to the release process...

There was a bit of hurry to bring IconDes to this release...

Anyway, all warnings are harmless.

Mirek

compile error while compiling TheIDE package

error message:

```
----- ide\IconDes ( GUI MSC71 WIN32 MSC ) ( 3 / 27 )  
File.cpp
```

```
'IconDes/IconDes.h': No such file or directory  
Des.cpp
```

```
'IconDes/IconDes.h': No such file or directory  
ide\IconDes: 2 file(s) built in (0:06.80), 3400 msec / file, duration = 6810 msec
```

There were errors. (1:18.98)

occur in the file (ide\iconDes\iconDes.h)

```
#ifndef _ide_IconDes_IconDes_h_  
#define _ide_IconDes_IconDes_h_  
  
#include <ide/Common/Common.h>  
include <IconDes/IconDes.h> // <-- this line error  
.....
```

My previous upp source version is 607-dev2
I don't know why I miss this file

It looks like this file want to include itself?
I've check the directory "ide\iconDes"
there are no another directory "iconDes" in it,
so the compiler can not find the file.
