Fix:
In Draw/DrawWin32.cpp change

```
PrintDraw::PrintDraw(HDC hdc, const char *docname)
   : Draw(hdc)
{
 DOCINFO di;
 memset(&di, 0, sizeof(di));
 di.cbSize = sizeof(di);
 di.lpszDocName = docname;
 if(::StartDoc(hdc, &di) <= 0) {
  Abort();
  return;
 }
 InitPrinter();
}
```

to

```
PrintDraw::PrintDraw(HDC hdc, const char *docname)
   : Draw(hdc)
{
 DOCINFO di;
 memset(&di, 0, sizeof(di));
 di.cbSize = sizeof(di);
 String sys_docname = ToSystemCharset(docname);
 di.lpszDocName = ~sys_docname;
 if(::StartDoc(hdc, &di) <= 0) {
  Abort();
  return;
 }
 InitPrinter();
}
```
