Hi!

1)I want to disable the 'MkDir' button in the FileSel dialog, so that the user cannot create new folders. Is that possible? If yes, how can I do it.

2)Is it possible that in the FileSel-Open dialog the user can only open existing files, but not type in new file names?

Thanks for any hints.

Zaurus

I have modified FileSel to allow both. See changelog.. (will be in next dev release).

Hi Mirek!

Thanks a lot for modifying the FileSel. Really great support for the users in this project.

Thanks

Zaurus
