Subject: Reduce the EXE size
Posted by mubeta on Mon, 30 Oct 2006 15:22:20 GMT

For me this is an old problem..

In the past I found the solution using all topic file only external.

Now I am searching the sama solution with image and translations, any idea?? I don't want that image file and translations it's included in the executable file, it's possible now? Just change some header file?

Thanks
Mauro Bottizzo

Hi,

FYI, topic files and image files are now compressed (dev version) and occupy much less space.
