hi all

im using freebsd 6.1 with fluxbox(dev version from ports)
and theide crashes X, but
blackbox + theide works fine

im trying fluxbox + theide on linux(ubuntu) too,
and it works fine

Which upp version do you use on both systems (605)?

Matthias

It seems to be independent of upp version.
I tried upp605 and last version of upp611 and the behavior was the same under fluxbox and

fluxbox-devel. Both versions worked in fluxbox, but not in fluxbox-devel.

My conclusion is that there is maybe something with fluxbox-devel, I know that this does not solve your problem, but this is beyond my knowledge .
