greetings,

just want to tell about:

I've created simple game engine in upp using ogre3d engine, lua as scripting language and wx tcb library as communication library via external port. in addendum audiere library as sound engine.

all works perfectly, as a whole tested on linux, but tested also on win32, but other cases...

as other projects:

gui intensively customizable interface(rearranging ctrls, editing attributes runtime etc) application heavy using communication via rs232, multithreaded...

others minor gui projects using ultimate++.

thanx very for all, all your work has a sence

unfortunatelly no. I am not proud of it, but it was a customer's wish

but maybe I post some screens somewhere someday
