Subject: load image from file: Different colors on different OS

Hi all!

I need to load many images from files. That works fine - but now we compiled our application on linux (developed under windows) - and the images have different colors?

Any idea, why this happens? I thought, the palette is stored into the image?

Thanks in advance,

WebChaot.

There was exactly this bug (already solved) 2-3 weeks ago. What U++ do you use ?

If it does not work with latest dev, any screenshots?

Mirek

We use 610-dev3

As I wrote you in other thread, we have to update some parts in U++ source after every new release. Therefore we try to do that not to often.

But it seems to be time to get latest release now

Thank you very much,

WebChaot
