Hello,

I like the sort with respect some column, but I want to prevent that of some other columns. Any idea?

Luigi

Not implemened.. Adding to TO-DO. (Exepect it in the new official release (probably in next dev))

does your gridctrl support copy-paste a set of cells now?

It supports "normal" and rectangular selections, however I have not implemented copy-paste for it (I always wanted, but bacause my apps didn't needed that feature I moved it in time again and again..). It will be there before gridctrl hits 1.0. I'm working on grid hard now so it should be in upcoming dev (maybe in the next).

Hello,

I would like to know if the above option is present in the current release. I've tried the 701-dev without to find it.

Thanks,

Luigi

Yes, it is I forgot to metion it..

`grid.AddColumn("c0").NoSortable()`

Should work, have not tested...

Yes, it is :) I forgot to mention it..

```
grid.AddColumn("c0").NoSortable()
```

Should work, have not tested...

Neither `grid.NoSortable()`; nor `grid.NoClickable()`; seem to be working for me, although `grid not sortable` `grid.Sortable(false)`; call is OK.

Tks.
