Are there any plans to add a horizontal scrollbar to RichEdit/RichView and make the scaling an option ?

Not yet, nobody wanted.

Can you explain why is that a good idea? If there is a good reason, we can do it..

Well, it's hard to edit when the control is too small.
It's against WYSIWYG (In my opinion ).
AbiWord , Microsoft WORD , WordPad - all of them have horizontal scrollbars,so maybe UWord deserves one too ?
