i have upgraded from Ubuntu 6.06 to 6.10 and have some problems:  
using Gnome:

Maximize on my second Screen does not work (on first it does)  
hw: Nvidia Geforce6600GT with dual dvi out with two 19"TFT using nvidia driver (worked on 6.06)

luzr wrote on Wed, 13 December 2006 21:47Do you want to say it worked on ubuntu 6.06?

I am not sure for Gnome, but for fluxbox: yes, it worked.

But now TheIDE crashes my X-Session when started within fluxbox so i can't figure out wether it worked on Ubuntu 6.06 and not on Ubuntu 6.10 (using fluxbox).

firefox and xterm do maximize on the second screen so i guess it is an problem related to TheIDE.

Hi guys,

I had a similar problem with my 8.04, drove me up the wall till i found the answer here  
[http://www.fixya.com/support/t850099-maximize\\_ubuntu](http://www.fixya.com/support/t850099-maximize_ubuntu)

I hope that none of you will climb any walls because of this.  
C ya around.
